

# *Open Analytics in Policing*

- ❑ Compare police outcomes to other police departments
- ❑ Adjust for research-based factors (demographics, economic conditions, prior crime rates)
- ❑ Identify high and low deviance departments

# *the democratic dilemma*

- ❑ For democratic accountability the public and government must reason with and use the same metrics
- ❑ Data & analytics = increasing exclusion of citizens
- ❑ Government agencies won't close this gap
- ❑ Comparability is key
